

Miro 955

Does the job faster, easier and more effectively.

"In my job as a painter, I sand walls and ceilings in houses daily. I tested the Miro 955 for 4 months and found that sanding was so much easier. Only a small amount of hand pressure is needed. It quickly sands large surfaces and leaves a smooth finish. The long Miro handle has good weight balance making the job easier. Miro is my choice for sanding."

MIRKA

Miro 955

A perfect partner for sanding walls and ceilings effectively

Miro 955

– the sanding machine with a long neck for walls and ceilings

The Miro 955 sanding machine from Mirka has been developed to get the best possible result when sanding filler on walls and ceilings. The Miro 955 is well designed and easy to use.

We recommend that you use Mirka's Abranet 225 mm discs. Thanks to Abranet's unique net construction, clogging is minimised increasing the life expectancy of each disc. Abranet provides the best sanding result, and the most effective dust reduction.

Miro 955 is very effective and at the same time easy to use

flexible sanding head
– sands walls and ceilings easily

large 225 mm disc
– sands large surfaces in a short time

Variable speed control
– makes different kinds of sanding possible

quick and flexible hose connection – reduces hose wear

double sided interface
– long life-span

long handle provides extra reach – no ladders required

comfortable handle with easy-to-reach controls

good weight distribution
– good ergonomics

dust extraction – connect an industrial vacuum cleaner to the Miro and the problem of dust is minimised

electrically-driven sanding
– no air pressure is needed

transport bag – allows easy transportation and protection for the machine
